

## Driving directions to Crooked Creek:

**From Big Pine, CA:** At the junction of highway 395 and California highway 168 at Big Pine, drive east on highway 168 into the White Mountains. About 13 miles from 395 at Westgard Pass, turn north (left) onto White Mountain Road. White Mountain Road is paved and its intersection with highway 168 is marked with a sign.

Once on White Mountain Road, drive north for about 10 miles on pavement. At Schulman Grove, about 10 miles from highway 168, the pavement ends, and the dirt road is passable by passenger cars but can be wash-boarded with sharp rocks. Drive slowly to avoid flat tires.

Continue north another 9 miles until the junction with the road to Crooked Creek, ignoring all side-roads. This junction is marked with a sign. Turn right and drive 1 mile east on this road to the Crooked Creek station.

It is a good idea to fill up your car with gas in either Bishop or Big Pine.
